

Throwaway Camera Challenge

How can we cope without autofocus, auto exposure, no instant replay, no through the lens viewing, 100s of pics on a compact flash card, etc.

Here is the challenge.

The first twenty members to put their name on the list at the club open from tonight (25th March) will be given a 27 exposure throw away camera before we finish for the summer.

You can do what you like with it to produce 6 images for viewing at a special night on 6th January 2009. You can if you wish do joiners, stiches or have individual images. Anything goes as long as it all happens within the camera - not the computer. If you want to digitally project your images from scans thats OK. But no manipulation only lightening or darkening the whole image. No selective dodging, no cut and pasting, no colour temperature change etc. But please bring your six original prints on the night.

Participants will be responsible for getting the film processed.

Let's see what we can do without the latest all singing and dancing Canons, Nikons and Leicas
